BARR'S "PURE" GRASS SEEDS

Produce Beautiful Lawns, Tennis and Cricket Grounds, Public Parks, Pleasure Grounds, etc.

Renovate Lawns, etc., in September, after the wear and tear of Summer.

The following mixtures of Grass Seeds are all thoroughly cleaned, and cannot fail to give the greatest satisfaction. There is neither Clover nor coarse grasses in the mixtures.

To ensure a fine lawn, free from weeds and coarse grasses, it is most important that the soil to be sown should be quite clean, that is, free from the seeds of objectionable plants, and the grass seeds used should consist solely of the fine-leaved dwarf-growing grasses.

In sowing grass seeds always take advantage of rainy or damp weather, and after sowing, give a slight covering of clean finely-riddled soil; this, followed by rolling, will ensure a successful vegetation, and if the grass is frequently mowed and constantly rolled, a fine smooth lawn will be the reward.

No. 1. Thames Embankment Lawn Grasses. This special mixture has been very successful on the Thames Embankment, and the various public and private parks and squares around London. It is well adapted for renovating or forming new pleasure grounds, Ornamental Parks, People's Parks, etc., in large towns, and for enclosures, such as Squares, in and about London, and other populous cities. Per lb., 1/3; per 10 lbs., 12/; per 20 lbs., 22/6; per 56 lbs. and upwards, at the rate of 1/1 per lb.

No. 2. Fine Lawn Grass Mixture for Improving Old Lawns or Laying Down New Ones, Croquet Grounds and Bowling Greens. In this mixture there is a larger quantity of small grasses than in No. 1, per lb., 1/4; per 10 lbs., 12/9; per 20 lbs., 24/6; per 56 lbs. and upwards, 1/2 per lb.

No. 3. Extra Fine Lawn Grass Mixture for Improving Old Lawns, or Laying Down New Ones, Croquet Grounds, and Bowling Greens. This is a specially fine mixture of dwarf growing grasses only, which make a finer, closer, and smoother turf, and does not require to be so often mowed as Nos. 1 and 2; it is specially adapted for select lawns. 1/8 per lb.; per 10 lbs., 15/6; per 20 lbs., 30/; per 56 lbs. and upwards 1/5 per lb.

No. 4. Hunter's New Mixture of Dwarf Growing Grasses. Specially recommended, when an extra fine, smooth lawn is required; the grasses are of the finest leaved kinds, and dwarfest growers, so that in using this seed a great saving is effected in mowing, besides having a perfect lawn. Per lb., 2/; per 10 lbs., 19/; per 20 lbs., 37/; per 56 lbs. and upwards, 1/9 per lb.

Dutch Clover, Finest White. If Clover is desired, it may be added to the Grass Seeds, at the rate of 3 to 4 lbs. per acre. Per lb. 1/6.

HOW TO DESTROY WEEDS ON LAWNS.

WATSON'S WEED-DESTROYING LAWN-SAND will kill daisies, dandelions, plantains, etc., on Lawns, Croquet Grounds, etc., and is also a good fertilizer for the grass. Fuller particulars will be sent on application. Price for sample canister, 2/6 and 5/6; per 1/2 cwt. 9/6; 1 cwt., 18/; 1 cwt., 34/.

BARR & SON,

12 & 13, KING STREET, COVENT GARDEN, LONDON.

ENTERED AT STATIONERS' HALL.

 Barr's Prize Medals for Cut Daffodil Flowers, Spring, 1892, see Daffodil Catalogue.

SPECIAL NOTICES.

- I. **Quality.**—When the Bulbs in Holland are in flower, we annually make a professional visit to the principal "bulb farms" to inspect the crops, and our supply of Dutch-grown bulbs is drawn from the healthiest "stocks" of the most reliable growers; we can therefore recommend them with the utmost confidence, and feel sure that if the bulbs receive proper cultural treatment they will give great satisfaction. *Simple and practical cultural directions head each family of plants in the following pages.*
- II. **Experimental Grounds and Nursery, Long Ditton, five minutes from Surbiton Station, S.W.R.** (close to the Surbiton New Recreation Grounds). Visitors at all seasons will find many things of interest and beauty in **Hardy Bulbs, Tubers and Herbaceous Perennial Plants.** In spring the brilliancy of the bulb fields surpasses description. From August to April one variety or another of our unique collection of rare **Species of Crocus** may be seen in flower, and in September and October there is a gay display of beautiful varieties of **Meadow Saffrons.**
- III. **Parcel Post.**—We shall in all cases use the **Parcel Post, when cheapest,** and the articles admit of being packed for safe transmission by "**Parcel Post.**"
- IV. **Carriage by Rail** may be deducted at settlement of account, on orders for Bulbs to any Railway Station in Great Britain, and to all ports on the Irish Coast (except goods coming under Clause VII.).
- V. **Orders, paid in advance.**—If it is necessary to send such by Rail, carriage will be prepaid, if requested, or, if not requested, a liberal equivalent in goods will be added.
- VI. **Returned Empties.**—A small charge is made for these, and if returned within a fortnight, allowance will be made for the same. *Returned empties should invariably have the sender's name on the address label for the identification of sender, and a notification be sent by post stating date of dispatch and name of Railway Company, that we may see that the empty is duly received.*
- VII. **Fruit and Forest Trees, Shrub, Plants in pots, Soils, Watson's Lawn Sand, Manures, Insecticides, Barr's Cut Flower and Fruit Conveyance Boxes, Barr's Improved Indoor Frames, Barr's Improved Hydropult Garden Engines, etc.**—on these we do not allow carriage.
- VIII. **Five per cent.** may be deducted from accounts if paid within one month from date of invoice.
- IX. **Post Office Orders and Postal Orders** to be made payable at Post Office, Covent Garden, W.C., or any other Post Office, these and all cheques to be crossed, adding the words "and Co.," or by preference "London and County Bank." Small amounts in a Registered Letter may be remitted in Postage Stamps or coin.
- X. **Daffodil Catalogue.**—The great importance now attached to Daffodils for forcing, and as cut flowers, and for out-door decoration in beds, borders, and to naturalize in grass, has made it necessary to devote a special Catalogue to these, to which we have added short lists from our well-known collections of **Irises, Pæonias—Doubles and Singles, Christmas Rosess, Lenten Roses, Michaelmas Daisies, Perennial Sunflowers, Phloxes, Day-Lilies, Piantain-Lilies,** and a few other beautiful **Hardy Herbaceous Plants.**
- XI. **Our Collection of Daffodils** has been described in the *Journal of Horticulture* of May 14th, 1891, as "**A great national or international museum of Daffodils**"; embracing not less than 500 species and varieties. The collection includes **The Weardale Daffodils,** raised by the late Mr. William Backhouse, and **The Longford Bridgs Daffodils,** raised by the late Mr. Edward Leeds, these seedlings and hybrids were arranged and named by Mr. Barr, and are now the favourite Daffodils of the period. Since Messrs. Backhouse and Leeds have passed from our midst, Messrs. Nelson, Leightlin, Rawson and de Graaff, have raised fine varieties, some of which are offered in our present and former Daffodil Catalogues. **These Daffodils** are all perfectly hardy, remaining uninjured in the open ground, during the most severe winters; out of doors the different varieties maintain a succession of bloom from February to end of May, and are more decorative and useful for cutting than any other hardy spring flowers. **Daffodils** are valuable for pot-culture (three to five bulbs in a 4 or 5-inch pot), cultural treatment and general management same as for the Hyacinth, to secure a constant succession of flowers from early in January. For full particulars and special directions as to culture, see our **Daffodil Catalogue, free on application.**
- XII. **Naming Daffodils.**—Cut specimens of Daffodils we undertake to name correctly at the charge of 6d. each, 2s. 6d. per dozen, 15s. per 100. This charge is made not for profit, but to cover attendant expenses. Address all cut specimens for naming, accompanied with a remittance, to our Nursery, Long Ditton, Kingston-on-Thames, Surrey.
- XIII. **Cut Daffodil Flowers.**—When in bloom out-of-doors, cut specimens of New Daffodils, correctly named, we forward post-paid at a low charge, thus offering a good opportunity to those who wish to extend their knowledge of these lovely flowers of spring. If a list of the varieties possessed by the sender is enclosed, such will be omitted; the names sent in such cases should range in column fashion and alphabetical order. A remittance should accompany order. *Fees will be found under Special Notices, Daffodil Catalogue.*
- XIV. **Medals, Certificates, &c.**—The Royal Horticultural Society, for many years past, have awarded to us, for our Exhibitions of Beautiful New Daffodils, **GOLD MEDALS, SILVER MEDALS, &c.,** with numerous Votes of Thanks, and many First Class Certificates. At the **Second Great Daffodil Conference** of the R.H.S., held from 15th to 18th April, 1890, our Grand Display of **New Daffodils,** was awarded the **ONLY GOLD MEDAL.** Many **Medals, Prizes and Certificates** have also been awarded to our **Beautiful Hardy Daffodils** by **ROYAL BOTANIC SOCIETY, CRYSTAL PALACE COMPANY, ROYAL AQUARIUM COMPANY, &c.,** at whose large London Spring Shows Barr's Daffodils are the great centre of attraction. Medals and many Certificates have been awarded to our exhibits of herbaceous plants, etc.

NOTICES TO OUR FOREIGN AND COLONIAL CORRESPONDENTS.

- XV. To insure prompt attention, *orders should be accompanied by a remittance, a draft, or an "order to pay,"* on a London agent; the remittance being sufficient to cover expense of cases, and also of carriage when the freight is required to be paid in advance.
- XVI. **SEEDS AND BULBS** can now be despatched in cases to India at the rate of 8d. per lb., through the **Indian Parcel Post,** or by "**Express**" at a lower rate.
- XVII. **In shipping Bulbs and Plants to India and the Colonies,** great care is exercised by us in selecting, preparing, and properly packing the same. Still, there are so many contingencies, that we cannot, in any way, hold ourselves responsible for the condition in which plants or bulbs reach their destination.
- XVIII. Our experience in *successfully preparing and shipping Seeds, Bulbs, and Plants to India and the Colonies,* extends over a long period.

A FEW SPECIALTIES.

- 111 **Barr's Beautiful Rainbow Mixture of Hyacinths, First Quality.** A splendid mixture of Hyacinths. The colours are evenly blended, and include red, scarlet, purple, lavender, porcelain, azure-blue, mauve, white, rose, blush, yellow, &c., very effective in flower beds and borders. Fine large bulbs, per 100, 18s. 6d.; per doz. 3 0
- NEW AND BEAUTIFUL HARDY DAFFODILS, for out-door or pot-culture.** See Daffodil Catalogue.
- Rare and Beautiful Single Tulips, all of great beauty, and little known as yet. See p. 11.
- 112 **New Large-flowered Paper White Polyanthus Narcissus,** the trusses and blossoms are much larger than the old Paper White, and it flowers earlier and freerper 100, 10s. 6d.; per doz. 1 6
- 113 **Chinese Sacred Lily,** the "Jos Flower" or "Flower of the Gods," and "Water Fairy Flower" of China and Japan. A species of Polyanthus Narcissus of marvellously rapid growth, and bearing a great abundance of bloom. It can be grown in bowls of water and pebbles, in any sitting-room or greenhouse, and will flower in a few weeks. *Cultural directions sent with all bulbs.* Large Imported Bulbs from Northern China, expected in December...per doz., 10s. 6d.; each 1 0
- 114 **Chionodoxa Lucilla** (*the Glory of the Snow*). The most beautiful of hardy spring flowers, charming as an edging or for masses in flower borders, colour deep azure-blue, with clear snow-white centre; dwarf. Home-grown bulbs.....extra large, per 1000, 63s.; per 100, 7s. 6d.; per doz. 1 0
- 115 **Chionodoxa Sardenis,** intense true dark blue, with small glistening white centre; very dwarf. Home-grown bulbsextra large, per 1000, 63s.; per 100, 7s. 6d.; per doz. 1 0
- 116 **Chionodoxa Gigantea** (new), very distinct and beautiful species; flowers beautiful soft lavender-blue, with white centre, twice the size of *C. Lucilla*, and more open; dwarf and robust. *First-Class Certificate, R. H. S., 1891.* Selected extra large Home-grown bulbs, per 100, 21s.; per doz. 3 0
- 117 **Chionodoxa Tmolusii** (new). We have refrained from offering this species in our present Catalogue as we are somewhat doubtful of its distinctness; this we shall be able to settle at our Nursery, 1892, where we have a large quantity planted
- 118 **Elwes' Giant Snowdrop,** the largest and most beautiful of single Snowdrops, Very large Selected Bulbs, per 100, 7s. 6d.; per doz. 1 0
- 119 **Puschkinia libanotica compacta,** a first-class spring-flowering bulb, flowers white, deeply shaded and striped blue, $\frac{1}{2}$ ft.; charming on rockwork and flower border, per 100, 15s.; per doz. 2s. 6d.; each 0 4
- Muscari** (*Hyacinthus*), very beautiful and rare species. See pp. 16 and 17.
- 120 **Iris reticulata, Sweet-Scented, for Early-Forcing,** 3 to 6 bulbs in a pot. The brilliant deep violet, golden-blotched flowers of this beautiful Iris may be had under glass in Januaryper doz. 8 6
- Iris, very Beautiful New and Rare Bulbous and Tuberous-rooted Species.** See p. 19.
- 121 **Hyacinthus candicans** (*the Great Snow-white Summer-flowering Hyacinth*). Flower stem 3 to 6 feet, surmounted with 20 to 50 graceful pendant bell-shaped flowers, equally decorative for the flower border and conservatoryExtra large flowering bulbs, per 100, 15s.; per doz. 2 6
- 122 **Anemone fulgens.** The hardiest and most brilliant and graceful of all Winter and Spring-flowering anemones, flowers rich dazzling scarlet, with black central boss, Strong Pyrenean ripened roots, per 100, 7s. 6d.; per doz. 1 3
- 123 " " " " Extra large " " " per 100, 10s. 6d.; per doz. 1 0
- 124 **Anemone fulgens annulata grandiflora,** large brilliant scarlet, with white ring at base, and large central black boss; foliage pale greenper doz. 15s.; each 1 6
- 125 **Anemone fulgens, Frisae** (new), handsome and distinct semi-double dazzling scarlet flowers, with gracefully curled petals.....per 100, 12s. 6d.; per doz. 2 0
- 126 **Anemone stellata, "Jewel"** (new), a very lovely and striking variety, flowers ruby-violet, with glittering white centre.....per 100, 12s. 6d.; per doz. 2 0
- 127 **Anemone coronaria, "St. Brigid,"** a lovely new strain, with very large flowers, some single, and others semi-double, of the most brilliant and varied hues. All have a blue-black central boss. The habit is graceful, and flowers are produced in great abundance.....per 100, 12s. 6d.; per doz. 2 0
- 128 **Anemone coronaria, "Glory of the South"** (new), a grand new variety, with very large single broad-petalled flowers, brilliant rich scarlet, with rich blue-black central boss, very beautiful, plant autumn and spring.....per 100, 10s. 6d.; per doz. 1 6
- 129 **New Double Anemone, "Blush Beauty,"** white, flaked and shaded delicate rose-pink, very lovely colourper 100, 10s. 6d.; per doz. 1 6
- 130 **New Double Anemone, "Chapeau de Cardinal,"** large intense rich scarlet flowers, p. 100, 10/6; doz. 1 6
- 131 **New Double Anemone, "Rose de Nice,"** bright rose, very pretty and distinct, per 100, 10/6; per doz. 1 6
- 132 **Autumn flowering Gladioli, choicest unnamed French,** producing fine bold spikes of large handsome flowers of beautiful and striking colours and markings, in great variety, p. 100, 21s.; p. doz. 3 0
- Lemoine's Beautiful New Hardy Hybrid Gladioli.** See page 24.
- Gladioli, Rare and Beautiful Species.** See page 25.
- 133 **LILIUM AURATUM** (The White Golden-rayed Crimson-spotted Hill Lily of Japan). This is indeed the Queen of Lilies. English grown bulbs, each, 1s. 6d., 2s. 6d. and 3s. 6d.; per doz. 15s., 21s. & 30 0
- 134 **Lilium longiflorum Harrisii** (The Bermuda or Easter Lily), a very beautiful and graceful Lily, with long handsome snow-white fragrant flowers. Strong bulbs for early-forcing, p. doz 15s; each 1 6
- 135 **Tuberose, Double American, "Excelsior Pearl,"** flowers large, snow-white, produced in abundance; dwarfper 100, 25s.; per doz. 3s. 6d.; each 0 4
- 136 **Freesia refracta alba,** prized for the delightful fragrance of its beautiful pure white flowers, which last very long in water. Invaluable for pot-culture and forcing. Plant eight or nine bulbs in a 5-in. potper 100, 7s. 6d.; per doz. 1 3
- Lachenallas,** a very beautiful and interesting class of bulbs for pot-culture. See page 31.
- Tigridias,** the most gorgeously coloured of all flowers. See page 27.
- 137 **Amaryllis, Greenhouse varieties,** we offer very choice unnamed seedlings, raised from the finest collection in Europe, and which give great satisfaction. Strong flowering bulbs, p. doz. 25s.; each 2 6

BARR'S BEAUTIFUL BEDDING HYACINTHS.

SPECIALLY SELECTED FOR OUT-DOOR CULTURE IN BEDS, RIBBONS, OR GROUPS.

When in Holland last spring, we selected these fine varieties of Hyacinths, as being most suitable for bedding, having *distinct and bright colours, a fine habit, and large flower spikes*. They will also be found valuable for filling rustic baskets, flower boxes, vases, etc.

BARR'S BEAUTIFUL RAINBOW MIXTURES OF HYACINTHS.

FOR OUT-DOOR CULTURE IN BEDS, BORDERS, ETC.

- 213 "BARR'S BEAUTIFUL RAINBOW MIXTURE OF HYACINTHS." This beautiful mixture of Hyacinths was specially arranged for by our Mr. Barr on the occasion of his visit to one of the large Dutch Bulb Farms. The colours are evenly blended, including *red, scarlet, purple, lavender, porcelain, azure-blue, mauve, white, rose, blush, yellow, &c.*, producing a fine effect in flower beds and borders.....1st size bulbs, per 100, 18/6; per dozen 3 0
- 214 "BARR'S BEAUTIFUL RAINBOW MIXTURE OF HYACINTHS," for mixed borders, shrubberies, and naturalization.....2nd size bulbs, per 100, 14/6; per dozen 2 3

POMPON, OR MINIATURE HYACINTHS.

These Miniature Hyacinths can be grown in small glasses, fancy pots, old china bowls, crystal dishes, jardinetts, etc., alone or associated with *Scilla sibirica*, *Chionodoxas*, *Crocus*, *Snowdrops*, *Dwarf Tulips*, and *Daffodils*, *Iris reticulata*, etc., planted in "*Barr & Son's Prepared Mixture of Charcoal and Cocoa Fibre*" (2s. per peck, 6s. per bushel), the surface being covered with fresh green carpet-moss.

In *children's gardens* and small flower beds, these Miniature Hyacinths, intermingled with other dwarf spring-flowering bulbs, make a fine display throughout the Spring months.

BULBS FOR EARLY-FORCING.

CULTURE.—Pot the bulbs 3 to 6, or more according to size, in a pot, at intervals during August, September, and October; then place the pots out-of-doors on a bed of ashes, and cover with cocoa-nut fibre a few inches above the top of the pots. There let them remain till the bulbs are well rooted, and have made a little top growth, when the pots should be placed in a moderately warm and moist temperature, *water being freely given*.

219 Roman Hyacinth, Early Dwarf White Sweet-Scented, universally prized in bouquets, and may be had in flower during October, November, and December.

Extra fine bulbs, 15s. per 100; 2s. 6d. per doz. | Good selected bulbs, 12s. 6d. per 100; 2s. per doz.
A Few Very Large Bulbs.....21s. per 100; 3s. per doz.

220 Roman Hyacinth, Early Rosy White, flowers from a fortnight to three weeks later than the White Roman Hyacinth. 12s. 6d. per 100, 2s. per doz.

221 Roman Hyacinth, Early Blue, flowers from a fortnight to three weeks later than the White Roman Hyacinth. 10s. 6d. per 100; 1s. 6d. per doz.

222 Narcissus, Early Paper White, Sweet-Scented. Produces trusses of beautiful snow-white fragrant flowers, and is in bloom with the Roman Hyacinth. 6s. 6d. per 100; 1s. per doz.

223 " " " " New Large-Flowered, very early and free-flowering, per 100, 10s. 6d.; per doz., 1s. 6d.

224 Roman Narcissus, Early Double, may be had in flower with the Paper White Narcissus. The blossoms are double white, with orange centre, and are produced in trusses. For bouquets and buttonholes they are greatly valued. 6s. 6d. per 100; 1s. per doz.

THE TULIP.

The Tulip is extremely hardy, and of easy culture, flowering as freely in the shade as in the sunshine, and producing as fine flowers in a confined town garden, as in more favoured places. Double and single Tulips, when associated together and planted in front of shrubs, maintain a longer display, than if either are separately planted. In gardens where the flower beds must be kept gay from the earliest dawn of Spring, plant between the lines of Tulips, Scilla sibirica, Chionodoxa, Snowdrops, or Crocus; these flower first, and when out of bloom the leaves form a green groundwork for the blossoms of the Tulip, or the leaves can be cut down close to the ground when the Tulip begins to flower.

EARLY SINGLE TULIPS.

The Single Tulip has a greater variety of rich, delicate, and attractive colours than any other section of spring-flowering bulbs. Those alone who have massed the different varieties, planting the bulbs 5 inches apart, can form an idea of their beauty and great diversity in shade and colour, and the grand effect they produce grouped in flower beds or borders. The Single Tulip is extensively grown for indoor decoration, three or five bulbs in a pot, and cultivated in the same way as the Hyacinth for early-flowering and succession. (See page 7, under Hyacinths, for cultural directions.)

The varieties of the Early Duc Van Thol Tulip, Nos. 474 to 478, flower together, and are of the same height, which renders them valuable for beds and borders, where an early Spring display is required, also for forming designs. For early-foreing, to bloom with the Roman Hyacinth and Double Roman and Paper White Nareissi, the scarlet and yellow Due Van Thol Tulip, No. 473, is extensively used. The growers for Covent Garden plant them thickly in boxes, and when in flower transfer to pots, 5 or 6 bulbs in a pot.

SINGLE TULIPS, SELECT VARIETIES, FOR OUT-DOOR CULTURE, OR FOR POTS INDOORS.

DOUBLE TULIPS.

Double Tulips have massive flowers of brilliant, diversified, and beautiful colours, and are suitable for beds on the lawn, terrace, etc., also as edgings to Rose beds and shrubberies. Planted in groups of three or more in flower and shrubby borders, they are very effective.

For sectional lines, where the Single Tulip is planted in designs, the **Tournesol**, No. 536, is most valuable; it is also the best to force for early-flowering, and is extensively grown for Covent Garden Market. **Imperator Rubrorum** is the best scarlet, and **Tournesol Yellow** the best of the yellows. For indoor decoration, the Double Tulip should be planted three bulbs in a pot, and receive the same cultural treatment as the Hyacinth. For beds or masses, **Rex Rubrorum**, scarlet, is the best to associate with **La Candeur**, white, and, so arranged, the effect is unrivalled amongst Spring flowers. Plant the bulbs six inches apart.

SHOWY AND BEAUTIFUL MAY-FLOWERING TULIPS.

This important section of Tulips connects, so to speak, the Spring and Summer flowers, and the appreciation of them is annually becoming more apparent, from the ready sale and high prices realized for their cut flowers, and the oft-repeated enquiry for the "old-fashioned Tulips of cottage gardens;" these usually consist of the discarded self-coloured unbroken seedlings of florists' flowers. During the first half of the present century florists' Tulips were the delight of thousands of amateurs from the Land's End to John O'Groat's House, and in Holland at an earlier date. A change of taste set in with the "bedding-out system," and our grandfather's flowers had to take a back seat; the number of amateurs gradually dwindled, and now few collections are to be found in the Home, or Southern Counties, but around Manchester the amateur is still to be found amongst the ranks of those who toil and those who live in affluence, and over the Tulip beds, and at the Tulip Shows, the master and servant meet in healthy rivalry and discuss the merits of this or that variety of **Bizarres**, **Byblœmens** or **Roses**; these being the divisions into which florists' Tulips are divided. **Bizarres** are those with the ground-colour yellow; **Byblœmens**, the ground-colour white; **Roses**, the ground-colour white. The amateur of the future will have no reason to complain of the period of apathy of the masses, as the few were not idle. Fine varieties continued to be raised, and severe selection became the order of the day, so that Holland who formerly led the van is now completely in the rear, and England can boast of being the stockholder of the finest florists' Tulips in Europe. We are not, however, concerned solely with our grandfather's Tulips, for beyond these have sprung up a number of quasi species of a highly decorative character, and to these we have given time and attention in getting them together, and hope annually to make additions of such sorts as are decorative in May, and can be naturalized or planted in permanent flower borders, shrubberies, or used for filling beds, etc. Mr. William Robinson in his paper at the Conference on Hardy Flowers, described his success in naturalizing *Tulipa sylvestris*, and recommends naturalizing Tulips in copses or drives through woods. If in cottage gardens, Tulips, such as we have referred to, remain uninjured and undisturbed for many years, why should not the same success attend their being naturalized in copses, etc.?

CROCUSES.

The Crocus is one of the earliest flowers of Spring, and occupies a prominent place in every garden. When planted as an edging in triple lines of one or more colours, the effect is striking. No Spring display surpasses that of broad wavy bands of golden-yellow, striped, purple, or of pure white Crocuses, when they expand their blossoms in February and March. In lawns and pleasure parks, planted in the grass, the Crocuses are extremely effective. For several years past in "Rotten Row," and other of the Royal Parks, Crocuses, Snowdrops, Daffodils, &c., have been planted in the grass, to the great delight of visitors, and the enhanced decoration of the parks. In wild gardens, woodland walks, etc., the Crocus should be associated with the violet, the primrose, and the oxlip.

CHEAP DUTCH CROCUS, FOR LARGE PLANTINGS.

To encourage extensive planting in shrubberies, woodlands, wild gardens, in grass, on lawns, pleasure parks, etc., Crocus are quoted by the thousand cheaply. For a gorgeous effect in early spring nothing can equal the Golden Yellow Crocus, masses of which will attract the eye at a great distance.

CHOICE NAMED LARGE-FLOWERED DUTCH CROCUS. Large Roots.

The following large-flowered named Crocuses are recommended for planting in groups, edgings, select beds and in designs. There are purples and blues of shades, pure whites, rich yellow, light and dark, striped sorts, &c. When the crocus is grown in pots, plant thickly, and treat as recommended for the cultivation of the Hyacinth, on page 7. When removed from under the ashes, place in an airy situation, and give water very freely.

BEAUTIFUL SPECIES OF CROCUSES,

Autumn, Winter, and Spring-Flowering.

These beautiful Crocusee are mostly wild species, collected by George Maw, Esq., in Greece, Syria, Palestine, etc., and cannot fail to be acceptable additions to our hardy flowers, especially the species which flower in Autumn and Winter, as they form a connecting link between the bulbous plants of Summer and those of Spring. At our Nurseries, Long Ditton, we have one or other of these beautiful Crocuses in bloom from September to April. About rockwork and other select places these beautiful Crocuses are seen to great advantage.

SNOWDROP (Galanthus Nivalis, etc.)

In the early Spring months, there is nothing more beautiful than a sheet of the snowy graceful blossoms of the Snowdrop. In planting an edging, mass, or a bed, whether in the turf of the lawn or in the flower garden, the bulbs should almost touch each other. A bed of surpassing beauty may be arranged, Snowdrops in the centre, with a deep fringe of bright blue Scilla sibirica, or Chionodoxa Lucilica, sardensis, or gigantea; a charming effect is also produced by intermingling in the proportions of two-thirds Snowdrops to one-third Scilla sibirica or Chionodoxa. When practicable such plantings of the Snowdrop should be permanent, and the surface of the soil in Summer, top dressed and sown with annuals, such as Nemophila, Leptosiphon rosea, etc., or planted with surface rooting bedding plants. The Snowdrop and the Crocus when planted in alternate circles are very effective, and follow each other so closely, that no gap is left in the succession.

In beds of Tulips and Hyacinths, Snowdrops are very effective between the lines; they flower while these bulbs are just moving the surface, and when the flowers are over there remains an elegant groundwork of green foliage.

The Snowdrop is most generally used as a permanent edging, and in masses, or in the fringes of lawns, where the grass need not be cut till May, and in pleasure parks, nesting in the grass is the place perhaps of all others where the Snowdrop looks most at home. In planting, the turf need not be disturbed, but holes five inches deep should be made with a dibber, dropping in two inches of fresh soil, then three or more bulbs, keeping the holes about three inches apart. Snowdrops when planted on banks and grass slopes, look lovely. The New Giant Single Snowdrop, Galanthus Elwesii, should be extensively used, the flowers being large and most valuable for cutting. The Chionodoxas are charming companions to Elwes' Giant Snowdrop; indeed, both are found growing wild together, and as nature is never found out of harmony, the information may be suggestive to those who desire to follow her.

[Barr and Son,

ELWES' GIANT SINGLE SNOWDROP (GALANTHUS ELWESII).

A distinct and beautiful species from the mountains near Smyrna, the largest and most handsome of all Snowdrops. It has large pure white globular segments, with rich emerald-green and white tube; when first opening, the shape of the flower reminds one of the *Fuchsia globosa* in form, although much larger.

WINTER ACONITE.

Early in Spring the golden blossoms of the Winter Aconite, resting on its emerald green cushion of leaves, are very beautiful and effective, especially when associated with Snowdrops, Early Scillas, Chionodoxas, Anemone fulgens, Apennina, etc. The green carpet produced by the foliage of Winter Aconite remains long after the flowers have disappeared, and this enhances the value of the plant, especially in situations where it is difficult to clothe the ground, such as under trees and in moist situations, which the Winter Aconite enjoys, and where few other flowering plants will thrive. It is a good useful plant to naturalize in grass, etc.

CHIONODOXA (Glory of the Snow).

The Chionodoxa is now so widely known and appreciated, it appears almost superfluous to say anything in its praise. The roots are now very cheap, and as Mr. William Robinson in his paper at the Conference on Hardy Flowers recommends it for naturalizing, we may just add we feel sure that, naturalized, the Chionodoxas will afford lasting pleasure. The three species offered are gems amongst spring flowers.

Home-grown roots only are quoted, as they are fully decorative the first season. Collected roots, though cheaper, are not decorative till the second or third season, consequently are not offered by us in the present Catalogue.

Chionodoxa Luciliæ (*The Glory of the Snow*). The most beautiful of all dwarf blue spring-flowers, and unsurpassed for edgings and masses in flower borders, and on rockwork; colour deep azure-blue, with clear snow-white centre. Mr. George Maw, in describing the circumstances under which he found the Chionodoxa Luciliæ, says, "At the lower level it roas out of flower, but near the summit of the mountain a mass was met with in full splendour, forming one of the most sumptuous displays of floral beauty I ever beheld; a mass of blue and white, resembling *Nemophila insignis* in colour, but more intense and brilliant." Had Mr. Maw seen *C. sardensis* and *C. gigantea*, we feel sure he would have been filled with perhaps even greater enthusiasm. The Chionodoxa Luciliæ was figured in *The Garden*, July 31d, 1880, and in 1878 the Floral Committee of the R. H. S. awarded to our specimens a First-Class Certificate.

642	Chionodoxa Luciliæ, Selected Home grown Bulbs	p. 1000, 45s.;	p. 100, 5s. 6d.;	p. doz. 9d.
643	" " " " " extra large	63s.;	7s. 6d.;	1s.

Chionodoxa sardensis, introduced by us in 1883. A First-Class Certificate was awarded to our plants, 1885, by the R. H. S., also by the Royal Botanic Society. *The Garden* of 14th March, 1885, writes:—"Chionodoxa sardensis is a gem among spring bulbs—one of the rare really blue flowers. A good sized patch is strikingly brilliant, the petals are coloured nearly to the centre." The deep gentian blue of this flower renders it so striking that for distant effect it cannot be too highly recommended.

Beautiful Coloured Plate of *C. Sardensis*, sent free, for 1s. 6d.

Chionodoxa gigantea (*C. grandiflora*), (new 1889). A very distinct and beautiful species. Flowers twice the size of *C. Luciliæ*, more open, and of a beautiful soft lavender-blue, with white centre. The habit dwarf, and robust. This is a valuable acquisition to our Spring flowers. A First-Class Certificate, Spring, 1891.

SNOWFLAKES (Leucojum).

SPRING, SUMMER, AND AUTUMN-FLOWERING.

Leucojum Vernum, the Spring Snowflake, is one of our earliest Spring flowers with blossoms resembling a large Snowdrop, handsome in outline, and prized for bouquets. *L. Estivum* and *Hernandezii*, the Summer Snowflakes, flower in April and May, and are remarkable for their elegant blossoms, which so closely resemble a Snowdrop as not to be distinguishable from it when used in bouquets. *L. Autumnale* is a charming neat graceful white, tipped pink Snowdrop-like flower, blooming in August and September. *L. trichophyllum* resembles *Autumnale* in its graceful growth, but the flowers are pure white and are produced in spring; this is a very rare plant, and is figured in *Bot. Register*, vol. vii., page 544. Mr. William Robinson, in his paper at the Conference on Hardy Flowers, remarked:—"The early-flowering Leucojum is a more precious flower for gathering than the Snowdrop, and the late-flowering Leucojum is graceful and handsome in grass."

LILY OF THE VALLEY. For forcing, and making plantations out-of-doors.

The clumps of Lily of the Valley quoted, have been specially prepared, and cannot fail to give abundance of flowers. In potting, the top of the crowns should be one inch below the rim of the pot; tight potting is of great importance, and care should be taken, in the first watering, that the moisture penetrates to the centre of the clump. Prepared crowns are now extensively used by the growers for Covent Garden Market, who put 20 to 30 in a 5-inch pot. The Berlin crowns are the best for very early forcing. The prepared clumps we think will be found by private growers preferable to erowns. The supply of Extra Selected clumps being limited, orders should be booked early for dispatch in November.

CULTURE.—A moist atmosphere and abundance of water is indispensable to success in forcing Lily of the Valley; therefore, to encourage simultaneously the development of flower and foliage, most growers place the pots in a shady damp part of the house, or invert a flower-pot over the crowns, till the flower and the foliage have made some progress, then they are removed to a less shady situation. If they are grown in a dry atmosphere, or get an insufficient supply of moisture, the crowns, technically speaking, "go blind."

NATURALIZATION.—The Lily of the Valley is admirably adapted for this purpose, and the Dutch Crowns will be found the best.

		each—s. d.				each—s. d.

701	Strong Berlin Crowns, for early-forcing, per 100, 6s.; per bundle of 25, 2s.						

DIELYTRA (LYRE FLOWERS). For forcing or planting out.

The most elegant of all forced plants for conservatory and room decoration, also to cut for furnishing vases. The graceful pendant branches are loaded with beautiful red heart-shaped flowers, and furnished with the most delicate rich green foliage. In shrubberies or herbaceous borders, few plants in summer are so attractive as the Lyre Flower.

SPIRÆA (THE MEADOW SWEET). For forcing, or planting out.

The large graceful, feathery, pure white, fragrant flowers of *Spiræa japonica* and the new variety *compacta multiflora* surpass all else in this way to cut for furnishing vases, while the plants are amongst the most decorative for the conservatory and room. In forcing, a moist atmosphere and abundance of water is necessary. *Spiræa palmata* has feathery clusters of lovely rosy crimson blossoms, which for vases are greatly prized. *Spiræa japonica fol. aureo-reticulatis* is a most handsome and ornamental plant, and forces as easily as *S. japonica*. In sheltered moist borders out of doors these plants are very decorative.

For other Species of Spiræas, see PLANT CATALOGUE.

IRISES.

The Iris is the "Orchid" of the flower garden. The blossoms of the Flag Iris are the most rich and varied in colour of hardy plants, and should be extensively planted in flower and shrubby borders, and naturalized in wild gardens. As a cut-flower these Irises are invaluable, competing in richness and variety of colour with the choicest and the most beautiful Orchids. A judicious selection of Flag Irises should include not only the rich colours and the æsthetic combinations of colours, but such varieties that will ensure a succession from Christmas to August, and this is achieved at an outlay not exceeding the cost of one specimen Orchid. See *Daffodil Catalogue*.

A selection can be made from the various bulbous Iris, which will give a succession of bloom from early winter, see page 19. The Spanish bulbous Iris flower in June and are rich in many colours and curious blending of shades, followed by the English bulbous Iris, remarkable for their large flowers and range of sumptuously beautiful colours.

To cut for filling vases and for table bouquets, all the Irises are admirably adapted, and when necessary to forward the flowers to a distance, gather just when the buds are colouring and before expanding, and, like the Gladioli, they will open in water.

ENGLISH IRIS (THE LARGE FLOWERED BULBOUS IRIS OF THE PYRENEES).

Bulbs supplied September to December.

These magnificent Irises thrive best in a well-drained light or medium soil; when the soil is very heavy surround the bulbs with sand and see well to drainage. When convenient plant as soon after the beginning of September as possible. We have planted as late as December, and even in January; but the earlier the planting is done, the greater the success. The varieties offered have been specially selected from some of the largest and best collections, as being most distinct, and will be found as strikingly beautiful and varied in colour as the most sumptuous orchids of the hot-house.

King Street, Covent Garden, 1891.]

ENGLISH IRIS—continued.

Our annual exhibits of cut flowers of this grand Iris at the London Summer Shows attract much attention and elicit great admiration.

SPANISH IRIS (THE ORCHID-LIKE BULBOUS IRIS OF SPAIN).

Bulbs supplied September to December.

The Spanish Irises are in flower a fortnight before the English, and differ from them considerably, the flowers being smaller, and the arrangement of colours quite different. In the combinations and curious blendings of the shades, the flowers equal in beauty many of the rare orchids. To cut for vases and bouquets they are greatly prized. They require the same cultural treatment as the English Iris. See coloured plate in *The Garden*, 1881.

Our annual exhibits of cut blooms of these beautiful Irises, at the London Summer Shows, form a great feature of attraction.

VARIOUS BEAUTIFUL

BULBOUS AND TUBEROUS-ROOTED IRIS SPECIES.

These Iris Species are all hardy and beautiful, flowering variously from November to June. The dwarf early species might be more enjoyed if planted on rockwork, where their flowers would be a little protected from heavy rains. *Alata*, *Histrio*, and *Vartani*, are charming winter-flowering species, followed in February by the *Reticulata* varieties, which have lovely violet-scented blossoms, the sweet-scented *Persica*, the beautiful new species *Rosenbachiana*, *Bakeriana*, and *Danfordiæ*. Next in succession come the interesting *Caucasica*, *Orchoides*, the curious Snakeshead Iris *Tuberosa*, and the new species *Sindjarensis*. These are followed closely by *Susiana* and *Iberica*, etc., with their beautifully netted large handsome flowers; these, with Iris *Gatesii*, and *Suworowii* surpass in beauty any written description that can be given of them. The charming dwarf Iris *Arenaria* with its small bright yellow flowers, and the pretty Peacock Iris, *Pavonia*, and Iris *Bloudovii*, flower in May, and are followed in June by Iris *Juncea*, *Boissieri*, *Lusitanica*, and the *Thunderbolt Iris*. *Iris Iberica*, and its varieties, *Sasi-no*, *Arenaria*, *Gatesii*, and *Suworowii*, require special treatment; Dr. Foster grows them successfully, planted out, and covered with a frame from the middle of June to the middle of October, thus securing to them a period of rest; from October till in flower, the lights are removed, and the plants exposed to all weathers. From a very small space, Dr. Foster cuts from them multitudes of flowers.

784	<i>Alata</i> (syn. <i>Scorpioides</i>), flowers pale blue of similar shape to <i>I. reticulata</i> , autumn, and winter-flowering, ht. $\frac{1}{2}$ ft.	per doz.	7/6 0 9
785	<i>Arenaria</i> , a rare and beautiful dwarf species, with canary-yellow flowers in May, ht. 1 ft.	2	6 0
786	<i>Bakeriana</i> (new), a most lovely and striking species, flowers of similar form to <i>I. reticulata</i> , <i>S.</i> sky-blue, <i>F.</i> white, heavily blotched and spotted rich dark violet, sweet-scented, flowers February and March, $\frac{1}{2}$ ft. Figured and described in "The Garden," May, 1890.	3	6 6
787	<i>Bloudovii</i> (new), a pretty species from Central Asia, bearing in May attractive soft yellow flowers, ht. 9 to 12 in.	2	6 6
788	<i>Boissieri</i> (new), <i>S.</i> and <i>F.</i> rich purple, with a golden-yellow blotch, June-flowering, a very handsome species, ht. 9 in.	2	6 6
789	<i>Caucasica</i> , primrose-coloured flowers, with silver-margined foliage, $\frac{1}{2}$ ft.	2	6 6
790	<i>Danfordiæ</i> , a lovely little dwarf species, with bright golden-yellow flowers, spotted brown, in February, charming on rockwork, ht. 3 in. Figured and described in "The Garden," May, 1890	3	6 6
791	<i>Gatesii</i> (new), a hardy robust species of the <i>Susiana</i> character, but flowers much larger, of a beautiful satiny creamy white, with faint rosy tinge, delicately veined and minutely spotted silvery-grey, June-flowering. We were awarded for this beautiful Iris a Botanical Certificate by the Royal Botanic Society, June, 1891, 2 $\frac{1}{2}$ ft.	10	6 6
792	<i>Histrio</i> , a charming species from Palestine, bright blue, blotched golden-yellow, in the way of <i>I. reticulata</i> , but much earlier	3	6 6
793	<i>Iberica</i> , a dwarf species of great beauty, with large handsome flowers, <i>S.</i> solitary-white, reticulated dark purple, <i>F.</i> rich brown-purple, with conspicuous black blotch, ht. 6 in.	per doz.	10/6 1 0
794	" <i>Van Houtteana</i> (new), of similar colour but more floriferous than <i>Iberica</i> , and flowers sometimes attaining double the size, ht. 8 in. to 10 in.	7	6 6
795	<i>Juncea</i> , <i>S.</i> and <i>F.</i> brilliant golden-yellow, one of the most beautiful and showy of bulbous Irises. To cut for vases it is invaluable. It prefers a rather dry and warm light soil	per doz.	3s. 6d. 0 4
796	<i>Lupina</i> (The Wolf's Fur Iris), a remarkable, striking, new species, with curious greenish yellow flowers, veined brownish red, and heavily bearded, resembling a wolf's fur, ht. $\frac{1}{2}$ ft.	4	6 6
797	<i>Lusitanica</i> , <i>S.</i> yellow, <i>F.</i> rich yellow, with orange blotch, handsome, ht. 1 $\frac{1}{2}$ ft.	per doz.	3/6 0 4
798	<i>Orchoides</i> (new), this species resembles <i>I. caucasica</i> , but flowers are larger and of a bright golden-yellow colour, produced in the axils of the leaves, April-flowering, 1 ft.	3	6 6
799	<i>Pavonia major</i> (<i>Vleuseuxia</i> , or <i>Moræa</i>). The Peacock Iris, flowers pure white, petals blotched clear celestial blue, very beautiful, a gem for pots or select places, out-of-doors, 1 ft.	p. doz.	1/6 ...
800	<i>Persica</i> , white, suffused pale blue, the petals blotched purple and gold, very fragrant, $\frac{1}{2}$ ft. This Iris prefers a warm, light, and dry soil	per doz.	2/6 0 3
801	" <i>purpurea</i> (new), this differs from the type in the flowers being of a purple colour	1	0 0
802	<i>Reticulata</i> , very beautiful, brilliant deep violet, blotched golden-yellow, strongly violet-scented, $\frac{3}{4}$ ft. Figured in "The Garden," 1881	per doz.	6s. 6d. and 8s. 6d. 0 6
803	" <i>cyanea</i> , <i>S.</i> sky-blue, <i>F.</i> dark blue, dwarf and free-flowering	2	6 6
804	" <i>major</i> (new), a splendid variety of similar colour to <i>Reticulata</i> , but considerably larger and broader in the flower, very handsome, 1 ft.	5	6 6
805	" <i>Krelagel</i> , red-purple, blotched golden-yellow, violet-scented, $\frac{3}{4}$ ft.	per doz.	7s. 6d. 0 9
806	" <i>Nelsoni</i> (new), flowers varying from beautiful pale blue to bright blue, $\frac{3}{4}$ ft.	3	6 6
807	<i>Rosenbachiana</i> (new), beautiful sweet-scented flowers generally white and rosy-violet, but varying a little. In way of <i>I. Persica</i> , but larger, quite hardy, $\frac{1}{2}$ ft. First-class Certificate R. H. S., 1889	2	6 6
808	<i>Sindjarensis</i> (new), a charming new species from Mesopotamia, like <i>I. caucasica</i> in growth; flowers white and azure-blue, prettily crested, March-flowering, 1 ft.	3	6 6
809	<i>Susiana</i> , a remarkably handsome species with immense flowers, bluish, tinted brown and covered with a network of dark lines, ht. 1 ft.	per doz.	7/6 0 9
810	<i>Suworowii</i> , a fine Iris of the <i>Iberica</i> class, but more hardy, <i>S.</i> and <i>F.</i> varying from red-purple to lavender, or grey, conspicuously reticulated with deep veins	per doz.	2/1 2 0
811	<i>Tuberosa</i> (Snakeshead Iris), flowers rich velvety violet-black and green, ht. $\frac{3}{4}$ ft.	per doz.	2/6 0 3
812	<i>Vartani</i> . A new species from Palestine, found growing near Nazareth, flowers pale azure, of <i>I. reticulata</i> form, but flowering in November or December, $\frac{1}{2}$ ft.	3	6 6

For Beautiful Bearded Flag Irises, Dwarf Flag Irises, Japanese Flag Irises, and Beardless Irises, see Daffodil and Plant Catalogues.

King Street, Covent Garden, 1891.]

IXIAS, MORPHIXIAS, SPARAXIS, TRITONIAS, AND BABIANAS.

CULTURE IN-DOORS.—From September to January plant in a four or five-inch pot five or six bulbs, using a compost of turfy loam, leaf soil, and silver sand. Make the soil firm about the bulbs, then plunge the pots in ashes in a cold pit or frame, and withhold water till the plants appear, then at first give sparingly. Except during wet or frosty weather, especially when the plants are in growth, the lights should be left off. Early in February, or when the plants have made sufficient growth, remove them to the greenhouse, keep close to the glass, and carefully attend to the watering.

CULTURE OUT-DOORS.—Plant from October to January, at a depth of three inches, and two to three inches apart, in a prepared light loamy soil, thoroughly drained, the bed raised six inches above the general level, with a due south aspect. Should the earlier plantings make foliage in autumn, slight protection must be given especially during severe frost. The plantings made in December and January need no protection beyond a little fern, which gradually remove in spring, as the plants spear through it. These late plantings will flower later than the earlier ones, therefore select a situation for them where the sun's rays will be somewhat broken, and thus the blooming period will be prolonged.

IXIAS.

The *Ixia* is a slender graceful growing plant, with long loose spikes of bloom. The colours are rich, varied, and beautiful, the centre always differing in colour from the other parts of the flower, so that the blossoms expanding in the sun's rays, present a picture of gorgeous beauty.

TRITONIAS.

The habit and growth of these resemble the *Sparaxis*, but the prevailing colours differ, and flowering later, they form a most important succession. The colours range from buff to rose and the richest glowing orange, the flowers always having a beautiful transparency. For pot-culture they are most valuable. At Cliveden, the late Mr. Fleming was in the habit of growing hundreds of pots of *Crocata* for furnishing jardins.

[Barr and Son,

BABIANAS.

The flowers of the *Babiana* range in colour from *blue* to the richest *crimson-magenta*, and set off by a *dark green* hirsute foliage, they form a striking contrast both in flower and foliage to the *Sparaxis* and *Tritonia*. The *Babiana* has the same fine dwarf compact growth, and is a good companion plant to the *Sparaxis* and *Tritonia*, in pots or out of doors.

THE RANUNCULUS.

CULTURE.—Plant the *Turban Ranunculus* from October to March, and the *Persian* varieties from January to April. When the soil works kindly, and the day is dry, draw drills two inches deep, and five or six inches apart; at the bottom of the drill sprinkle a little sand, press the tubers firmly into the soil, claws downwards, and cover with sand, then with soil, keeping the crown of the tuber two inches under the surface. During severe weather, cover the early plantings with dry litter, leaves, or old tan, and this remove before the foliage in Spring gets injured. In April and May, during dry weather, water the beds freely, two or three times a week if necessary; and when the flower-buds appear, water daily if required, and continue doing so while the plants are blooming; this will insure fine flowers. *In watering, wet the foliage as little as possible.*

DOUBLE PERSIAN RANUNCULUS FOR BEDS, RIBBONS, AND MASSES.

The named varieties have been selected on account of their large flowers and fine colours.

NEW LARGE-FLOWERING TURCO-PERSIAN BEDDING RANUNCULUS.

This new race of *Ranunculus* is remarkable for a vigorous growth, and is profusely floriferous; the plants attain a height of about 18 inches, and produce from 10 to 15 blossoms each. Where cut flowers are in demand, these new *Ranunculus* are most valuable, as flowers may be gathered from the same bed several times a week, during the flowering period, without impairing the display.

THE ANEMONE, OR WINDFLOWER.

For brilliancy of colour few flowers can compare with the *Anemone*, which in Spring produces its masses of double or single blossoms, in an endless variety of shades, *scarlets, crimsons, roses, blushes, lilacs, blues, purples*, and *snow-whites*, all of which for cutting are valuable, lasting long in water. For beds, edgings, and masses, it is matchless, and may be had in bloom, weather permitting, from November to July, according to situation, locality, and time of planting.

CULTURE.—Any good soil, moderately well drained, suits the *Anemone*. Plant in succession *A. coronaria* varieties from October to May, the roots four to six inches apart, at a depth of two to three inches, choosing a dry day, and when the ground is in good working condition. *The plantings for Summer and Autumn-flowering, should be in a situation where the ground is moist, and is shaded from the sun's rays from after 10 or 11 a.m.*

NEW DOUBLE POPPY ANEMONES FOR BEDS AND MASSES (A. coronaria varieties).

The flowers of the *Double Poppy Anemone* resemble a semi-double *Hollyhock*, and are extremely handsome. When planted from October to December, they flower in succession during the early Spring months, *King Street, Covent Garden, 1891.*

ANEMONE, CORONARIA, STELLATA, AND FULGENS.

NEW DOUBLE ANEMONES—continued.

and those planted from January to April flower in succession from April to July. Each amateur has to find out whether Autumn or Spring planting is best, soil and climate making all the difference. p. 100, p. doz.

NEW VARIETIES OF POPPY ANEMONE (A. Coronaria). (Plant Autumn and Spring.)

945	Anemone coronaria, "Glory of the South" (new). This is a grand new Anemone. The flowers are single and very large, with broad rich brilliant scarlet petals and a rich blue-black central boss. A flower of great beauty and fine substance, per 100, 10/6; per doz. 1/6.	
946	Anemone coronaria, "St. Brigid," a very lovely strain of Anemones. The flowers are very large, single, and semi-double, and of the most brilliant and varied shades of colour. All flowers show a handsome blue-black central boss, have a graceful habit, and are remarkably free-flowering, per 100, 12/6; per doz. 2/0.	

ANEMONE STELLATA (THE STARRY WINDFLOWER OF THE RIVIERA).

These Starry-flowered Single Anemones are remarkable for variety of brilliant colours, elegant flowers, and graceful foliage. A light well-drained soil and warm sheltered situation suit them best; on rock work they look charming. They also make good pot-plants with six roots in a pot. Plant September, October and November.

ANEMONE FULGENS (THE BEAUTIFUL SCARLET WINDFLOWER).

Anemone fulgens is the most brilliant and graceful of all Winter and Spring-flowering Anemones. The rich dazzling scarlet flowers, and light elegant growth, render it the most attractive scarlet flower of Spring. It is invaluable for table bouquets or vases, as it lasts a long time in water. If the roots are planted early in Autumn, flowers, weather permitting, may be gathered from Christmas; its hardiness is beyond all question, so that roots may be safely planted any month from August to May. The plantings made April and May should be in a situation where in summer the ground is moist, and the sun's rays do not fall on them after 10 or 11 a.m. (Figured in The Garden, 1877.)

A FEW RARE AND BEAUTIFUL SPECIES OF CAPE GLADIOLI.

The species of *Gladiolus* offered below we feel sure will be acceptable to lovers of bulbous plants. They are all quite hardy except *Alatus*, *Galeatus*, *Gracilis*, *Hirsutus*, *Præcox*, and *Ringens*. In the milder parts of England, the west coast of Scotland, and in Ireland, these are hardy, but in less favoured parts they should be grown under a south wall, or protected in winter with a frame or handlight, or cultivated in pots under glass. *Psittacinus* and *Sulphureus* plant in Spring. The different species flower from May to June, except where otherwise stated.

	each—	s. d.
1055 <i>Alatus</i> , a pretty wing-flowered dwarf species, bright salmon-scarlet, lower petals, bright yellow, very beautiful, June-flowering, $\frac{3}{4}$ ft.	0	9
1056 <i>Concolor</i> , flowers carmine, with grey	0	9
1057 <i>Galeatus</i> , flowers orange and yellow, very dwarf	0	9
1058 <i>Gracilis</i> , a very pretty April-flowering species, flowers blue and white, 1 ft. to 3 ft.	0	9
1059 <i>Grandis</i> , handsome spikes of curious reddish brown flowers, 2 ft.	1	0
1060 <i>Hirsutus</i> , flowers rosy white	0	9
1061 <i>Milleri</i> , large creamy white fragrant flowers, early	per doz.	7s. 6d.
1062 <i>Præcox</i> , pale rose, October-flowering.....	0	9
1063 <i>Psittacinus</i> , robust spikes of showy scarlet and yellow flowers, 3 ft. per 100, 10s. 6d.; per doz. 1s. 6d.	0	3
1064 <i>Purpureo-auratus</i> , long spikes of golden-yellow flowers, with conspicuous purple blotch, striking and distinct, August-flowering, 3 ft.	per doz.	3s. 6d.
1065 <i>Ringens</i> , bright orange and yellow flowers	0	9
1066 <i>Rosceus</i> , tall spikes of pretty bright rose flowers	per doz.	7s. 6d.
1067 <i>Saundersii</i> , handsome bright salmon-scarlet flowers, lower petals white, spotted scarlet, showy, flowering July to August, 2 ft.	1	6
1068 <i>Sulphureus</i> , fine spike of flowers, canary-yellow, spring-flowering, $\frac{3}{4}$ ft.	0	9
1069 <i>Tenellus</i> , curious reddish brown and yellow flowers, very fragrant, June-flowering, $\frac{3}{4}$ ft.	0	9
1070 <i>Tristis</i> , graceful drooping spikes of large greenish white flowers, which have a delightful perfume at evening. In vases it is exceedingly attractive, and lasts long in water.....	0	9
1071 <i>Vinulus</i> (new), creamy white, with crimson-maroon blotch, a beautiful little species	1	0
1072 <i>Watsontanus</i> , flowers bright scarlet, produced in March	0	9
1073 <i>Xanthophilus</i> , rose, very fine	0	9

AMARYLLIS.

Under this heading are arranged plants, differing very much in character, and requiring separate treatment.

THE GUERNSEY AND BELLADONNA LILIES.

 The Guernsey and Belladonna Lilies are received by us in bud early in September. The supply being always uncertain, orders for them should be given as soon as possible after the 1st, and not later than the 15th September. When executing orders for the Guernsey and Belladonna Lilies, we carefully examine the flower-buds, and send only such bulbs as give promise of good flowers. Delay in transit, neglecting to plant immediately, or, perhaps, an undeveloped defect in the flower bud, often leads to partial failure, and as we cannot hold ourselves responsible for such contingencies, purchasers are recommended to buy an extra quantity, as the roots are so very inexpensive.

CULTURE.—Immediately the Guernsey and Belladonna Lilies are received, pot them in light soil, prepared cocoa-fibre or moss, and give water liberally. Bulbs of Guernsey Lilies, purchased after the flowering season, should be potted and grown under glass. Bulbs of Belladonna Lilies may be planted under a south wall at a depth of one foot, and when established will flower annually.

	each—	s. d.
1075 Guernsey Lily (<i>Nerine sarniensis</i>), flowers brilliant scarlet, having the appearance, when seen with the sun's rays on them, of being spangled with gold	per doz.	10/6 1 0
1076 Belladonna Lily (<i>Amaryllis belladonna</i>), produces umbels of large white flowers, shaded and tipped deep rose	per doz.	9/ 1 0
1077 " <i>maxima</i> , large handsome rosy purple flowers, produced in great abundance. In September these will be sent out in bud or in bloom, afterwards as bulbs ...p. doz.	30/	3 6

HARDY AMARYLLIS.

Amaryllis Candida (*Zephyranthes*) "The Flower of the West Wind," throws up in autumn a profusion of white Crocus-like flowers. *Lutea* (*Sternbergia*), "The Lily of the Field," is also a good hardy bulb, for edgings and groups, its rich golden-yellow Crocus-like flowers, expanding in Autumn from the midst of a bright fresh green foliage. *Amaryllis longifolia* vars. (*Crinum*) produce, late in Summer, large umbels of large beautiful funnel-shaped sweet-scented blossoms. It is perfectly hardy, and valuable to plant in mixed flower borders.

King Street, Covent Garden, 1891.]

VALLOTA PURPUREA, AND THE JACOBEA LILIES.

Vallota purpurea, known also as "The Scarborough Lily," is most valuable as an Autumn-flowering plant, and as a cut flower for filling vases. We recommend it to be planted out of doors in May, and when in bud potted up for conservatory decoration. *Amaryllis formosissima*, the *Jacobea* Lily and its variety *Glaucia*, are quaintly-shaped beautiful flowers, they force well, and should be potted in succession for Spring decoration. In April the dry bulbs can be bedded out or planted in the flower borders for Summer-flowering.

- each
 1082 *Vallota purpurea* (The Scarborough Lily), large handsome bright scarlet flowers in umbels. s. d.
 Established in pots, 15s., 21s. & 30s. per doz.; 1s. 6d., 2s. 6d. & 3 6

 1084 " " *glaucia*, bright crimson-scarlet, very striking per doz. 5s. 6d. 0 6

CHOICE GREENHOUSE AMARYLLIS.

These are grand plants in the conservatory, and to cut for table bouquets and vases. With management, these magnificent *Amaryllis* may be had in bloom for many months. The unnamed seedlings we specially recommend; they are from the best collection in Europe, and cannot fail to please, both as regards variety of colour, size, and beauty of flower. *The bulbs offered are large and full grown, ready to flower.*

CULTURE.—Immediately after potting, place in a moist warm temperature if at command, and, if convenient, plunge the pot to the rim in a gentle, steady, moist bottom heat; thus treated, a vigorous leaf growth is produced, and a strong stem with a large umbel of large flowers secured. In the absence of bottom heat the plant does well in any ordinary greenhouse or sunny sitting-room window.

- 1085 CHOICE UNNAMED SEEDLING AMARYLLIS. Purchasers are sure to be satisfied with every flower, and have a good chance of getting flowers of exceptional beauty. Full sized bulbs supplied per dozen, 25s.; each, 2s. 6d.

THE LILIUM.

THE LILY is matchless amongst hardy plants for variety of colour, chasteness, and beauty of form. It is an important plant to associate in beds with *Rhododendrons* and *Pæonias*, and in borders amongst *Herbaceous* plants. *As a pot-plant the Lily is a general favourite.* We enumerate here only a few popular showy kinds, but a fuller list, with cultural notes, will be found in our *Daffodil Catalogue*, and a complete list may be had on application.

BARR'S SELECTIONS OF LILIES.

- 1123 " " " " Mixed varieties of crimson, red, orange, etc., shades " 7s. 6d. ...

For general descriptive list of Lilies, and cultural directions, etc., see *Daffodil Catalogue*.

TIGRIDIA (Tiger-spotted Flowers).

No flower is more gorgeously coloured than the *Tigridia*. Fine American roots are supplied from December to May, and should be planted March, April, or May, or for pot-culture, plant earlier. As soon as potted plunge in a cold frame and withhold water till the foliage appears, and then give sparingly at first. Plantings out-of-doors may be made as late as Midsummer, and these, if lifted and potted up in September, will flower under glass late in Autumn. (Beautiful Coloured Plate of *T. alba*, price 2/6.)

- | | | | | | |
|------|--|----------|---------|---|---|
| 1124 | <i>Tigridia conchiflora</i> , petals yellow, cup yellow, spotted scarlet, 1 ft. | per doz. | 3s. 6d. | o | 4 |
| 1125 | " <i>grandiflora rubra</i> , petals rich scarlet, cup spotted crimson on a yellow ground, flowers very large, 1 ft. | per doz. | 3s. 6d. | o | 4 |
| 1126 | " <i>alba</i> , petals white, cup spotted ruby, large, very chaste and an exceedingly beautiful flower, 1 ft. | per doz. | 5s. 6d. | o | 6 |

TUBEROSES.

CULTURAL TREATMENT FOR FORCED FLOWERS.—The growers for Covent Garden pot the *Tuberose* singly in 5 or 6-inch pots, and plunge in moist bottom heat, withholding water till the foliage appears, then giving it freely, growing on in a house with a high temperature and a moist atmosphere, till the flower buds develop; at this stage, if the plants are intended for the conservatory or sitting-room, remove to a greenhouse temperature. The bulbs for early flowering pot as soon as they can be procured, and plunge the pots in a temperature of about 60 degrees. The bulbs for succession keep dry or pot at once, to make root growth; in either case the temperature should not be below 50 degrees nor the bulbs will suffer.

- | | | | | | |
|------|---|-------------------------|---------|---|---|
| 1127 | Double American Dwarf, "Excelsior Psarl"; much prized, being comparatively dwarf, flowers pure white and double; strong forcing roots, ready in January, p. 100, 25/; p. doz. 3/6 | each | s. d. | o | 4 |
| 1128 | Extra Early African, flowers pure white, very double; good forcing roots, ready in September | per 100, 25s.; per doz. | 3s. 6d. | o | 4 |
| | A few very large Bulbs, per doz. | 5s. 6d. | o | 6 | |

PART II.

DESCRIPTIVE LIST ALPHABETICALLY ARRANGED, OF VARIOUS BULBS AND TUBEROUS-ROOTED PLANTS.

Those marked thus * ripen late and will be ready to send out from the middle of October to March. All other bulbs, etc., are ready for despatch from 1st September. Orders which embrace later ripening bulbs, etc., will be executed in two parts, carrying forward those not ready for delivery, till they are safe to move.

The height of the plants is given in feet and inches. In most cases cultural notes are added.

- | | | | | |
|------|--|------------|---------|---|
| 1129 | * <i>Abobra viridiflora</i> , an elegant hardy summer climber, with miniature scarlet fruits | each—s. d. | 1 | 0 |
| 1130 | * <i>Achimenes</i> 25 beautiful varieties, 1 root each, 10/6; 3 roots each, 25 varieties, 30/- | | | |
| 1131 | * " 12 beautiful varieties, 1 root each, 4/6; 3 roots each, 12 varieties, 12/6 | | | |
| 1132 | <i>Agapanthus umbellatus</i> (the Blue African Lily), flowers in handsome umbels, half-hardy | | 0 | 6 |
| 1133 | " " <i>maximus</i> . Same colour as above, but with larger flowers | | 1 | 6 |
| 1134 | " " <i>albus</i> (the White African Lily), flowers in handsome umbels, half-hardy | | 1 | 6 |
| 1135 | " " <i>fol. variegatis</i> (the variegated African Lily), with silver-margined foliage | | 2 | 6 |
| 1136 | " " <i>Mooreanus</i> , small blue flowers in umbels, graceful | per doz. | 7s. 6d. | 0 |

The *Agapanthus* are fine plants for indoor decoration, and in tubs on terrace walks and lawns, few plants look more noble; when planted out by streams, lakes, and ponds, it may be questioned if any plant is so effective.

- | | | | |
|------|---|---|---|
| 1137 | <i>Albuca canaliculata</i> , bearing handsome bunches of green and gold flowers, very fragrant, 1½ ft. | 1 | 6 |
| 1138 | " <i>Nelsoni</i> (new and rare), produces large handsome spikes of white almond-scented flowers, with brown stripe. Under glass flowers pure white, 3 to 5 ft. | 7 | 6 |

The *Albucas* are Cape bulbs. Decorative in the greenhouse, or planted out under a south wall, supplied during September and October only.

- | | | | | |
|------|---|---|---------|---|
| 1139 | <i>Allium acuminatum</i> , a beautiful species, with bright rose-coloured flowers in umbels, 1 ft. p. doz. 4/6 | 0 | 6 | |
| 1140 | " <i>aurum</i> (Moly), bright yellow flowers in umbels, 1 ft. per 100, 6/6 | | 1s. ... | |
| 1141 | " <i>azureum</i> , handsome intense blue flowers, quite hardy, 1½ ft. | 0 | 9 | |
| 1142 | " <i>cyansum</i> (new), pretty deep blue flowers in clusters, ht. 4 to 6 in. | 3 | 0 | |
| 1143 | " <i>descendens</i> , large dark red-purple flower heads, in compact umbels, 2 ft. p. doz. 3s. 6d. | 0 | 4 | |
| 1144 | " <i>nigrum</i> (magicum), large umbels of flowers, whitish with black centre; summer-flowering, 3 to 4 ft. per doz. 2s. 6d. | 0 | 3 | |
| 1145 | " <i>Karataviense</i> , remarkable for its very large broad glaucous-green handsome foliage | | 3 | 6 |
| 1146 | " <i>Murrayanum</i> , bright rose-violet flowers, in umbels, 1 ft. per doz. 3s. 6d. | 0 | 4 | |
| 1147 | " <i>neapolitanum</i> , white flowers, much used in bouquets, 15 in. per 100, 5/6; " 1s. ... | | | |
| 1148 | " <i>Ostrowskianum</i> , (syn. <i>oreophyllum</i>), a beautiful new species from Asia Minor, with large heads of beautiful rose-coloured flowers | | 4s. 6d. | 0 |
| 1149 | " <i>pedemontanum</i> (syn. <i>narcissiflorum</i>), rose-purple, drooping bell-shaped flowers in clusters, beautiful and very distinct, ¾ ft. | 1 | 6 | |
| 1150 | " <i>pulchellum</i> , graceful heads of charming bright rosy purple flowers, in July, ¾ ft. per doz. 4/6 | 0 | 6 | |
| 1151 | " <i>flavum</i> , small canary-yellow flowers in graceful drooping umbels, very charming, July-flowering, ¾ ft. per doz. 7s. 6d. | 0 | 9 | |
| 1152 | " <i>roseum</i> , most pleasing rosy puce colour, 1 ft. per doz. 2s. 6d. | 0 | 3 | |
| 1153 | " <i>triquetrum</i> , white, striped green, graceful drooping umbels, pretty, 1 ft. per doz. 2s. 6d. | 0 | 3 | |

All the *Alliums* are hardy and very showy. *A. neapolitanum* is easily forced, and the cut blooms are extensively used for vases and table bouquets.

- | | | | | |
|------|--|------------------------|---|---|
| 1154 | * <i>Astromeria aurea</i> , orange flowers, spotted carmine, valuable as a cut flower p. 100, 15/; p. doz. 2/6 | 0 | 3 | |
| 1155 | * " <i>aurantiaca</i> , flowers similar to <i>A. aurea</i> , but deeper and richer in colour " 15/; " 2/6 | 0 | 3 | |
| 1156 | * " <i>hæmantha</i> (<i>chilensis</i>), various, beautiful shades of rose, crimson, orange, yellow, buff, and bluish, with yellow and crimson markings, valuable as cut flowers, p. 100, 21s.; p. doz. 3s. 6d. | 0 | 4 | |
| 1157 | * " <i>pelegrina alba</i> , white, very chaste and beautiful flowers | Plant on a warm south | 2 | 6 |
| 1158 | * " <i>rosea</i> , rose-coloured flowers, beautifully spotted | border, or under glass | 1 | 0 |
| 1159 | * " <i>psittacina</i> , bright crimson flowers splashed green and mahogany, 3 ft. per doz. 3s. 6d. | | 0 | 4 |
| 1160 | * " <i>tricolor</i> , charming white and yellow flowers, striped and blotched crimson " 4s. 6d. | | 0 | 6 |

The great Crocus-like flowers of the Colchicum, or Autumn Meadow-Saffron, carpet the ground in September and October with colours ranging from pure white to intense crimson. All the Colchicum flowers are more or less chequered. Parkinsoni and Variegatum are the most conspicuously so. The foliage appears in Spring, and is almost as varied as the flowers; some have large massive leaves, others small and frill-like; a grand bulb to naturalize in grass.

In spring there is no prettier sight than a mass or edging of Dog's-Tooth Violets, with their beautiful variegated foliage and graceful Cyclamen-like flowers, ranging in colour from deep purple to the purest white. The large handsome American varieties of *Grandiflorum* are strongly recommended; they prefer a partially shaded and moist situation. Mr. William Robinson, referring to the Dog's-Tooth Violet, in his paper at the Conference on Hardy Flowers, says, "This beautiful and delicate-looking plant surprises me at the free way it grows in grass where I have planted it." Mr. R. has unconsciously imitated nature. In the high Pyrenees it abounds in the grass.

1280	<i>Eucharis amazonica</i> . The snow-white flowers of this handsome stove-plant are deliciously fragrant, much prized for bouquets and ladies' hair, 1½ ft. Pots of strong established roots	5s. 6d. &	7 6

1339	" <i>glauca</i> , spikes of pretty metallic-blue flowers, handsome spotted foliage, very striking, ¾ ft. Figured, Bot. Mag., Vol. 64, Tab. 3552	1 0
1340	" <i>luteola</i> , flowers yellow, with green and red, robust grower, 1 ft.	per doz. 4s. 6d. 0 6
1341	" <i>Nelsoni</i> , deep rich golden yellow, large flowers, one of the finest, 1 ft.	1 3
1342	" <i>pallida</i> , large spikes of pale metallic-blue flowers, tinged pink, fragrant, 1 ft.	1 0
1343	" <i>pendula</i> , large brilliant red flowers, tipped green and purple; very beautiful and showy, ¾ ft.	per doz. 4s. 6d. 0 6
1345	" <i>pustulata</i> , white, very distinct and remarkable blistered foliage, 1 ft.	1 0
1346	" <i>quadricolor</i> , scarlet, yellow, and green, with broad crimson tip, very beautiful, 1 ft., per doz. 7s. 6d.	0 9
1347	" <i>tricolor</i> , scarlet, yellow and green, 1 ft.	4s. 6d. 0 6
1348	" <i>viridis</i> , green and white, 1 ft.	1 0

The *Lachenalias* are very beautiful plants, with curiously spotted leaves and handsomer flower spikes, early in Spring. They should be potted early in a compost of loam, sweet leaf soil, and sand, placed in a greenhouse or frame, and never allowed to suffer for want of water. See Plate in "The Garden," 1880.

1349	* <i>Littonia modesta</i> , an elegant greenhouse climber, yielding abundance of slender deep golden-coloured bell-shaped flowers. In warm situations may be planted out-doors in April	3 6
1350	<i>Lycoris aurea</i> , golden pendant flowers, October-flowering, 1 ft.	} Greenhouse bulbs of great beauty. {
1351	" <i>radiata</i> , rosy carmine flowers, June-flowering, 1½ ft.	
1352	* <i>Malvastrum Gilliesii</i> (<i>Modiola</i>), figured in "The Garden" of 28th Jan., 1882. This charming hardy rock-plant is profusely covered with crimson-purple flowers all the summer	5 6

Methonica. See *Gloriosa*.

1353	* <i>Milla biflora</i> , pure white, large flowers of great substance, should be grown in pots under glass, or kept dry, and planted out in March.	Home grown bulbs..... per doz. 7s. 6d. 0 9
1354	" <i>hyacinthina lactea</i> , pure white, an exceedingly useful plant for cut flowers, 2 ft.	3s. 6d. 0 4
1355	" <i>laxa</i> , large rich Tyrian purple flowers, 1 ft.	3s. 6d. 0 4
1356	" <i>longipes</i> , graceful white flowers borne in umbels	5s. 6d. 0 6
1357	" <i>Murrayana</i> , fine lavender-blue, lined purple, 1 ft.	7s. 6d. 0 9
1358	" <i>uniflora</i> , white, shaded porcelain, ¾ ft.	per 100, 2s. 6d.; per doz. 6d. ...
1359	" <i>illacina</i> , porcelain, striped violet, ¾ ft.	per 100, 2s. 6d.; per doz. 6d. ...

The *Milla* (*Triteleia*) is a family of varied character; *Uniflora* is very dwarf, and produces masses of beautiful flowers in Spring. It is very effective on rockwork, etc., also as an edging, and in small beds or naturalized in grass; grown in pots, it is very charming. *M. laxa* and *Murrayana* in June and July produce large umbels of lovely coloured flowers; *M. hyacinthina lactea* is very decorative; all are perfectly hardy.

Modiola geranioides. See *Malvastrum Gilliesii*.

1360	* <i>Montbretia Pottsi</i> , graceful branched spikes of small crimson-scarlet, <i>Gladiolus</i> -like flowers, remarkably showy, 2 ft. Figured in "The Garden," 1880	p. 100, 7s. 6d.; p. doz. 1s. 3d. ...
1361	* " <i>crococsmiflora</i> , elegant branched spikes of handsome showy brilliant orange-red shaded yellow flowers, 2½ ft.	per 100, 15s.; per doz. 2s. 6d. 0 3
1362	* " " "Golden Sheaf" (new), handsome spikes of beautiful deep golden-yellow flowers; good dwarf habit	per doz. 10s. 6d. 1 0

Montbretias rank amongst our most decorative bulbous plants in summer. Their graceful spikes of showy flowers are valuable for cutting and last long in water. They thrive out-doors in a sandy loam, but require protection in winter.

1363	* <i>Nemastylis Pringlii</i> , a very beautiful new bulbous plant in June, bearing charming star-shaped azure-blue flowers two inches across, ¾ ft. Hardy on rockwork in warm spots. Keep dry during winter, and plant early in spring	1 6

1381	<i>maritimum</i> , white flowers, delightful fragrant, suitable for pot-culture, or to plant under a south wall at a depth of a foot, $1\frac{1}{2}$ ft. per doz. 7/6	0 9
1382	* <i>Pardanthus chinensis</i> (Leopard-spotted Flower), beautiful crimson flowers, spotted orange, produced in Autumn, requires light covering in winter, $1\frac{1}{2}$ ft.	0 9
1383	* <i>Pentlandia niulata</i> , a beautiful greenhouse bulb, with handsome crimson drooping flowers, $1\frac{1}{2}$ ft. ...	0 9
1384	* <i>Phædranassa chloracea</i> , yellow, very fragrant, $1\frac{1}{2}$ ft. p. doz. 5/6	0 6
1385	<i>rubro viridis</i> , rich crimson, tipped green, $1\frac{1}{2}$ ft. ...	1 6
1386	<i>schizantha</i> , rich vermilion, tipped yellow and green	1 6
1387	<i>ventricosa</i> , scarlet, protruding anthers, $1\frac{1}{2}$ ft.	3 6
<p>The <i>Phædranassas</i> (Queen Lilies) are handsome pot-plants, but may also be grown under a south wall, planted at the depth of a foot, flowers April to June.</p>		
1388	* <i>Polygonatum multiflorum majus</i> , the larger-flowered form of Solomon's Seal, a graceful hardy plant. Valuable to naturalize in wild gardens and woods, or for early-forcing, 2 ft. p. doz. 3s. 6d.	0 4
1389	* <i>Richardia æthiopica</i> (The Lily of the Nile), large white trumpet-shaped flowers 7s. 6d.	0 9
1390	<i>nana</i> (Little Gem), new dwarf variety, with pure white flowers, beautiful in pots	2 6
1391	<i>albo-maculata</i> , flowers white, foliage beautifully spotted white, an extremely effective pot-plant, and valuable for beds and borders	per 100, 18s.; per doz. 2s. 6d.
1392	<i>hastata</i> , fine yellow flowers, with black centre and white-spotted leaves	3 6
1393	<i>melanoleuca</i> , fine primrose flowers, with black centre	per doz. 7s. 6d.
<p>The <i>Richardias</i> are all greenhouse plants. <i>Albo-maculata</i> is much prized for its beautifully spotted foliage; <i>Hastata</i> for its fine yellow flowers. These two varieties may also be planted outdoors in spring for summer decoration.</p>		
1394	* <i>Rigidella immaculata</i> , a beautiful Mexican bulbous plant, flowers brilliant orange-scarlet, in June, very showy, $1\frac{1}{2}$ ft., same culture as for <i>Tigridias</i>	per doz. 21s.
1395	<i>Romulea speciosa</i> , a graceful little bulbous plant with grassy foliage, and deep carmine satiny flowers, charming on rockeries, &c., $\frac{1}{2}$ ft. per 100, 8/6; per doz. 1/6	...
1396	<i>Salvia patens</i> , brilliant deep blue flowers, very beautiful, 3 ft. per doz. 5s. 6d.	0 6
1397	<i>alba</i> , beautiful pure white flowers, 3 ft.	1 0
<p><i>Salvia patens</i> and <i>alba</i> should be planted out during summer. In autumn they may be potted up, and bloomed in the conservatory during winter, or the roots stored in sand, and planted out in April.</p>		
1398	<i>Sanguinaria canadensis</i> , white flowers in spring, borne above the coltsfoot-like leaves, truly charming; plant in moist peaty soils and shady places; perfectly hardy, $\frac{1}{2}$ ft. per doz. 4/6	0 6
1399	<i>Schizostylis coccinea</i> , rich scarlet <i>Gladioli</i> -like flowers in spikes. Quite hardy. It delights in a sheltered situation, amongst trees and shrubs. Established masses lifted in Autumn and potted, flower freely under glass for months, $1\frac{1}{2}$ ft. strong tufts, established in pots, per doz. 4/6	0 6
1400	Singles plants, for flower borders and naturalization ... per 100, 10s. 6d.; per doz. 1/6	...
<p> Solomon's Seal. See <i>Polygonatum</i>.</p>		
1401	<i>Sparaxis pulcherrima</i> , a remarkable plant, with a dense elegant grassy foliage, from which rise graceful wiry flower stems, 3 to 5 feet high, arching over in a broad graceful curve, from which hang beautiful bell-shaped flowers; quite hardy. Figured in "The Garden," 1838	2 6
1402	* <i>Stenomomsson flavum</i> (Coburgia), beautiful yellow flowers, 4 to 5 in. long } Greenhouse bulbs of easy	3 6
1403	<i>incarnata</i> , beautiful orange-red flowers, 4 to 5 in. long } culture. June-flowering. }	2 6
1404	* <i>Tecophylæa cyanocrocus</i> , a most beautiful Chilean spring-flowering bulb, of dwarf growth, bearing large crocus-like deep blue flowers, delicately scented. It makes a charming pot-plant, or can be grown in a warm dry situation on rockwork, or under a south wall	per doz. 21s.
<p><i>Triteleia</i>. See <i>Milla</i>.</p>		
1405	<i>Tropæolum azureum</i> , true, a beautiful rare bulb. Flowers rich violet-blue, white centre, very pretty	2 6
1406	<i>brachyeras</i> , a fine yellow-flowered species	2 6
1407	<i>Jarrattii</i> , scarlet, orange, and black	per doz. 5s. 6d.
1408	<i>pentaphyllum</i> , red and green, perfectly hardy	1 6
1409	<i>polyphyllum</i> , golden-yellow flowers in long trusses, quite hardy	per doz. 4/6
1410	<i>speciosum</i> , rich scarlet flowers in clusters, quite hardy; pots. full of roots, per doz. 7s. 6d. & 10s. 6d.; 9d., 1s. &	1 6
1411	<i>tuberosum</i> , yellow and red, very distinct, quite hardy. Plant in Spring, p. doz. 3s. 6d.	0 4

TROPEOLUMS—continued.

The foregoing Tropæolums are all beautiful climbers. *Azureum*, *brachyceras*, and *Jarratti*, are recommended for the greenhouse to trail over trellises, round pillars, etc. *Pentaphyllum* is a fine climber for warm sunny situations out-doors. *Polyphyllum* revels on a sunny rockwork. *Tuberosum* requires an open situation and poor soil, and should have branches to scramble over. *Specioeum* is one of the most lovely of hardy climbers, and may in the south be successfully grown if planted in a cool, moist situation, away from the sun's rays; it delights in a shady place, and especially near a stream where its roots can enjoy the water.

1412	<i>Urceolina pendula</i> (syn. <i>aurea</i>), a splendid warm-house bulb, with large golden-yellow flowers, each tipped with rich green, and produced in graceful drooping terminal clusters.....	s. d.	3	6
1413	<i>Watsonia</i> , 6 in 6 named vars. 2/6 } The <i>Watsonia</i> is very ornamental and showy;			
1414	.. mixed varietal } requires same cultural treatment as the <i>Gladiolus</i> . { p. doz. 2s. 6d.			
1415	<i>Zephyranthes Andersoni</i> (Habranthus), flowers brown and gold, 3/4 ft. } p. doz. 5/6 ... 6			
1416	.. <i>atamasco</i> , large pure white flowers, nearly 3 in. long, ht. 1/2 ft. } These Swamp Lilies are a beautiful family of bulbous plants requiring greenhouse culture, or they may be grown in a sunny well-drained situation against a south wall. Charming pot-plants, several bulbs in a pot. Early summer-flowering.
